

## Year 1 Science

As you are aware, we have been learning about animals including humans.

What is a carnivore? What is a herbivore? What is an omnivore?

Research and create a poster of what carnivores, herbivores and omnivores are. Which animals are in each group? What do they eat? Give examples of animals and their food. Write a brief definition of what the words mean to.

You could then create a non-chronological report (like an information page) your favourite animal. You could include headings like

- What is their habitat?
- What do they look like?
- What do they eat?
- Do they give birth to live young?
- What group are they from and what are their characteristics?  
(mammals/fish/birds/reptiles/amphibians)
